Demo Client · DEMO-0012
11 November 2026 · v1.0

Handover note

> Demonstration package built from synthetic data.

Client: Demo Client · **Engagement:** DEMO-0012 · **Final run:** `de_20261111T142312Z_449cf0`

1. Open this first

`00_START_HERE` opens with one click in any browser and holds everything below. Nothing has to be installed.

If you are	Start with
The owner	One-page summary
The management team	Presentation, with speaker notes
The data lead	Report
Whoever runs the platform	Runbook and the platform package
Whoever builds dashboards	Connection guide and the published tables
The analyst who checks numbers	Workbook (Control panel first)
Whoever wants to explore	Dashboard
The auditor	Methodology

2. What was handed over

#	Item	File
1	Final report	`01_DemoClient_DataEngineering_Report_v1.0_20261111.pdf`
2	One-page summary (tear sheet)	`02_DemoClient_DataEngineering_Summary_v1.0_20261111.pdf`
3	Results presentation	`03_DemoClient_DataEngineering_Presentation_v1.0_20261111.pptx`
4	Results workbook (all numbers)	`04_DemoClient_DataEngineering_ResultsWorkbook_v1.0_20261111.xlsx`
5	Model documentation (methodology)	`05_DemoClient_DataEngineering_Methodology_v1.0_20261111.pdf`
6	Handover note	`06_DemoClient_DataEngineering_HandoverNote_v1.0_20261111.pdf`
7	Platform package (engine, configuration, models, schedules, database scripts, self-test)	`07_DemoClient_DataEngineering_PlatformPackage_v1.0_20261111.zip`
8	Runbook (every night, and when something breaks)	`08_DemoClient_DataEngineering_Runbook_v1.0_20261111.pdf`
9		`09_DemoClient_DataEngineering_ConnectionGuide_v1.0_20261111.pdf`

#	Item	File
	Connection guide (Power BI, Looker Studio, Excel, the cloud)	
10	Interactive dashboard: one HTML file, opens in any browser	`10_DemoClient_DataEngineering_Dashboard_v1.0_20261111.html`
11	BI exports for Power BI / Looker Studio	`BI_Exports/ (CSV, long format)`

3. Who does what

When	What	Who
This week	Install the package where it will run and pass its self-test	IT
This week	Fill in .env with the access the sources need	IT
This week	Switch on the nightly schedule	IT
Every morning	Read the run's result; fix anything set aside at its source	Data owner
This month	Connect the dashboards to the published tables	Analyst

4. How the files work together

- The **platform package** is what runs: install it once with its setup script; its self-test proves the installation before any real source is connected.
- Secrets go in a `.env` file on the machine that runs the platform, never in an email or in the configuration.
- The **presentation** has speaker notes on every slide, and its charts can be edited in PowerPoint.
- The **workbook** recalculates: choose a night in the yellow cell of the Control panel.
- Editing the Excel and PowerPoint files needs Office, or a free tool such as Google Sheets and Slides. Reading them does not: both are inside `00_START_HERE`.

5. What we need for the next run

Access to each source as agreed (a drop folder, a read-only database user, or an API key entered by the client), the place the platform will run, and a named owner for each source.

6. Data and access

All client data will be deleted within 10 business days of the end of the engagement (or retained for the next run as agreed).
